Candidate Questionnaire

Candidate’s name ______________________  District ______

Draft of questions for the candidate questionnaire:

1. On what issues affecting Kansans do you feel you could benefit from scientific information to inform your decision-making?

2. What sources would you trust to inform your decision-making in regards to science and public health?

3. Do you support mandated mask wearing during covid-19 outbreaks? How would you communicate to the public about the science behind wearing masks?

4. How do you view the role of elected bodies in determining policies and procedures such as the licensing of secondary science teachers and curricular standards in science?

5. What should be done to help recruit and retain highly qualified STEM teachers for Kansas schools?

6. Do you have any other comments on the relationship between science and public policy in Kansas that you wish to share with the voters?
